INTEGRATED ARCHITECTURE OF STRUCTURE

THE MAIN FACTORS

SUPPORTING THE GROWTH OF INNOVATIVE ACTIVITY IN COUNTRIES-PARTNERS

- **Creation of legislation of reasonable and effective financial and legal mechanisms of activities and a regulatory and legal framework (governmental, regional, municipal) of High-Tech Industry Digital Parks and Special Economic Zones that mediate the accumulation, distribution and targeted use of investment resources, both budgetary and extra budgetary, international integration among of involved parties, organizations and governmental regulators.**
- **Creation of integrated programs to support innovations, which is an important missing link in the development of innovation activities in each region.**
- **Creation of an internal regulator and lead-partner, performing the role of an information and analytical center, providing support and successful implementation of innovative projects.**
- **Creation of the necessary quantity and quality of services that provide real practical assistance to innovators in the implementation of projects.**
- **Use by the subjects of innovation activity, of the architecture information interaction that meet their needs in terms of communication, the volume and quality of the information services provided.**
- **Increase demand for innovative projects, products and services from industrial companies, venture funds and other potential consumers.**
- **Creation of a regional state order for innovation.**
- **Creation of effective financial instruments ensuring the participation of investment companies, banks, venture funds, governmental, public and private investors in financing of innovative projects.**

ADVANTAGES:

- There is the solution for use of this systems in settlement between the OPEC countries, through the secured Crude oil & gas settlement converter.
- There is the solution for generation of crypto - currency into the real production sector.
- There is the solution for establishing OPEC & METAC LOGISTIC Digital Trading Investment Platforms.
- There is the solution for integration into the OPEC system for possible partners of OPEC
- There is the solution for transition to "outcome" out of dollar equivalent as the settlement converter and transition to OPEC Cryptocurrencies.
- THERE IS THE SOLUTION FOR THE UNIFIED PLAN for SOCIAL AND ECONOMIC DEVELOPMENT OF THE COUNTRIES OF OPEC and its possible partners.

ACTUAL DISADVANTAGES

- Absence of the united database.
- There is no structure of UNITED OPEC cryptocurrency treasury.
- There is no UNITED OPEC cryptocurrency SETTLEMENT-PAYMENT-CLEARING platform.
- There is no Infrastructure on Control of Capitalization of Investment Resources.
- There is no System for corporate accounting of the regions, of socially oriented assets by means of funding of relations of production within OPEC system.
- There is no system of provision of guarantees for share accounting of providing projects and productions on the system of corporate interstate accounting.

BUT ALL MISSED AND NON-EXISTING SOLUTIONS MAY BE SOLVED SINCE THE PROCESS HAS BEGAN

GLOBAL CRYPTO HUBS

**THIS PROJECT IN ITS EVOLUTIONARY DEVELOPMENT IS JUST THE BASIC ELEMENT FOR
THE FORMATION OF THE NEURAL ARCHITECTURE OF COMMUNICATION ALGORITHMS
FOR MODULARLY ORIENTED TRANSACTIONAL OPERATIONS WITH THE BUILT-IN
ASYMMETRIC ENCRYPTION OF TRANSFORMATION-ORIENTED INFORMATION,
PROVIDES A SECURED COMMUNICATION ALGORITHM FOR THE INTEGRATION PROCESS
OF CREATIVELY ACTIVE PERSONALITIES.**

HOW TO ORGANIZE COLLABORATION

- ❖ The form of organization of interaction - Public-Private Partnership to create a Transmission Digital Platform for Economic Cooperation, based on the principles of funding and forms for balances of zero taxation of stock entities in the region, regardless of the system of trade relations.

We are ready to offer you a more detailed plan if you have:

1. A desire to explore in more depth our new digital network balancing and network-centric digital platforms.
2. A desire and opportunity to integrate and synchronise data on the «HTI METAC^{BT}® SATELLITE SYSTEM^{IDC}» Cross platform.
3. A desire to explore in depth the most important advantages of our digital «HTI METAC^{BT}® SATELLITE SYSTEM^{IDC}» cross-platform based on Net-centric Architecture with application of Service-Oriented Architecture (SOA).

Sincerely,
